PROFESSIONAL SUMMARY

Senior Unity Game Developer with 5+ years of experience building and optimizing high-scale mobile games.

Contributed to titles with 50M+ downloads, achieving <1% crash rates and ANR <0.45%. Specialized in performance optimization, multiplayer systems (Photon, PlayFab), and scalable Unity architectures.

EXPERIENCE

2021 - Present

Terafort

Game Developer

- Contributed to games with 50M+ downloads across FPS, TPS, and simulation genres
- Reduced ANR to <0.45% and crash rate to <1%, improving store ratings and retention
- Built multiplayer systems using Photon PUN and PlayFab supporting thousands of concurrent users
- Improved development efficiency by 30% by building reusable Unity tools and modular C# frameworks
- Increased ad revenue by 18% through optimized AdMob, Unity Ads, and AppLovin integrations

2020 – 2021

ZMectr

System Engineer

- Designed and deployed IoT systems with 99% uptime
- Reduced production issues by 25% through proactive debugging and system monitoring

PROJECTS

Prado Parking(50M+ Downloads)

- Optimized performance and reduced ANR to <0.45%
- Improved retention through gameplay and stability improvements

Kung Fu Fighting (50M+ Downloads)

- Enhanced gameplay flow and ensured cross-device stability

Commando Shooting Stars (Original Project)

- Developed FPS systems, upgrade mechanics, and loot systems
- Integrated Firebase for backend systems

Rider 3D

- Built UI systems, upgrade mechanics, and offline economy
- Maintained crash rate below 1%

SKILLS

Core:

- Unity (C#)
- Performance Optimization (CPU, GPU, Memory)
- Multiplayer Systems (Photon, PlayFab)
- Mobile Game Development

Languages:

- C#, C++, JavaScript, Python

Technical:

- Firebase
- Monetization (AdMob, Unity Ads, AppLovin)
- Cross-Platform Development (Android, iOS)

Tools:

- Git / Bitbucket
- Agile Development

EDUCATION

B.Sc. Computer Science

Northern University Nowshera | 2017 – 2021
